Resort. In town, you can also hook up with the [Rio Grande Trail](#), which heads south and east to Aspen.

The Glenwood Canyon Recreation Trail follows the winding course of the Colorado River between Glenwood Springs and Dotsero. The paved trail is easy going and heavily used by outdoor recreationists of all pursuits. The trail is closed in winter and sometimes into the spring when the water level in the Colorado River is high. There are plenty of resting areas, as well as picnic sites, restrooms and fishing access points.

Along this scenic trail through the river canyon you may spot wildlife, including a band of bighorn sheep introduced into the area in the early '90s. You will also see plenty of people floating this stretch of river, which also shares the corridor with Interstate 70.

Start the trail in Glenwood Springs at Glenwood Canyon
