Closure Notice: The Crabtree Creek Greenway is closed between N. Raleigh Blvd. and Crabtree Blvd (miles 5.25-6). Please check with the government of Raleigh for more current updates and detour information.

The Crabtree Creek Greenway stretches just over 19 miles along the Crabtree Creek corridor through forested greenways, city parks, residential areas, and among some business areas. There are multiple sections of the trail in Morrisville, Cary, and Raleigh.

Morrisville (1.4 miles)

The trail follows the Crabtree Creek west for about 1.4

miles from Evans Road through Cedar Fork District Park to Crabtree Crossing Parkway. Before crossing the creek at its west endpoint, the trail connects to the Hatcher Creek Greenway. The trail's eastern end on Evans Road has a seamless connection to Cary's section of the Crabtree Creek Greenway, which offers access to Lake Crabtree and Umstead State Park (8801 Glenwood Ave, Raleigh). There are restrooms at Cedar Fork District Park (228 Aviation Pkwy, Morrisville).

Cary (2 miles)

There are two segments of the trail in the Town of Cary. The longer segment (1.7 miles) continues east from the Morrisville section at Evans Road and runs along the southern shore of Lake Evans. Crossing the lake via 730-foot concrete boardwalk, the trail ends by connecting with the [Black Creek Greenway](#). The paved trail is 10-foot-wide and has a maximum slope of 5% with the majority of the route being quite level. Dogs are welcome as long as they remain on a leash.

There is a 0.3-mile section, the Bond Park Segment, which splits from the White Oak Creek Greenway to head north along a tributary of the Crabtree Creek in Fred G. Bond Metro Park (801 High House Rd, Cary). The park includes Bond Lake, a variety of sports fields and courts, a community center, restrooms, parking, and the Bond Park Lake Trail.

Additional restrooms are available at the Old Reedy Creek Road trailhead (2139 Old Reedy Creek Rd, Cary) and North Cary Park (1100 Norwell Blvd).

Raleigh (15.9 miles)

The trail passes through stands of loblolly pine, elm, ash, buckeye, river birch and poplar with an understory of box elder, hornbeam holly and dogwood. Trail users also experience lovely views of Crabtree Creek, with large rock outcroppings here and there, as well as steep slopes. At Lassiter Mill Park (3362 Lassiter Falls Cir, Raleigh) you can see

# Crabtree Creek Greenway

North Carolina

**States:** North Carolina

**Counties:** Wake
